W/FEB. 23
Webinar

NOW as a LIVE WEBINAR Series w/LIVE CE Units

Feb. 2, 2025: Updates in Pediatric Dentistry for the Active Child *Dr. Steven Mills is a Pediatric Specialist in private practice and noted lecturer. He has also published extensively in the fields of pediatrics, sports dentistry and traumatology.*

Feb. 23: Updates in Local Anesthesia PLUS Responsibilities & Requirements of Prescribing Schedule II Opioid Drugs (now MANDATORY for ALL TX, IL & CA license renewals & can only be given by pre-approved CA CE providers) *Dr. Patrick Quaranta is a former professor of Oral Medicine at UMDNJ-New Jersey Dental School.*

March 23: Superb Direct & Indirect Restorations- Posterior Composites and Crown Cementation *Dr. Robert Marus lectures internationally, his smile makeover techniques have been published in numerous dental journals worldwide & Dentistry Today featured him as a top dental leader in lecturing for four consecutive years.*

April 27: OSHA, Infection Control & the CA Dental Practice Act (can only be given by CA pre-approved CE providers) *Leslie Canham, RDA, lectures nationwide using her unique humor and cutting-edge information to present tough subject matter in an interesting way.*

May 18: Treating Caries Chemically... WTF? (Without The Filling!) *Dr. Douglas Young Dr. Young is a renowned expert in minimally invasive dentistry and cariology, is Professor Emeritus at UoP, served on the ADA Council of Scientific Affairs and has co-authored several seminal ADA papers including Clinical Practice Guidelines on caries management.*

June 29: Redefining the Endodontic-Restorative Continuum (Including Deep Margin Elevation, Treating Resorption Cases, Cracked Teeth and Many More BRAND New Cases and Techniques)! *Dr. Robert Salehrabi is an assistant clinical professor at the University of Colorado Dental School and GPR program, author of articles in the Journal of Endodontics and other peer-reviewed journals & the International Endodontic Federation Research Award recipient.*

**ALL LIVE WEBINARS ARE ON SUNDAYS, 8AM-3PM PACIFIC TIME
AND 7 LIVE CE UNITS - TUNE IN AND ENJOY OUR COURSES FROM ANYWHERE!**

**\$149 FOR EACH LECTURE OR THE ENTIRE 6
COURSE WEBINAR SERIES, 42 CA APPROVED
LIVE CES, FOR ONLY \$549 (THAT IS LESS
THAN THE COST OF FOUR COURSES)!!**

**\$199
BONUS
INTERACTIVE
CBCT
WEBINAR**

July 27: 3-D Radiographic Imaging in Dentistry Including CT-Guided Dental Implant Surgery *Dr. Jay Reznick is a Diplomate of the American Board of Oral and Maxillofacial Surgery & was the first specialist in the U.S. to integrate CBCT and CAD/CAM in his practice. He has published extensively & taught dentists about basic and advanced implant dentistry, surgery, and 3D digital technology for the last 2 decades.*

COURSE TOPICS

Updates in Pediatric Dentistry for the Active Child: *The presentation will be structured in four age groups of children (age 0-2, 3-5, 6-12 & 13-18). The largest area to be discussed for the active child will be primary and permanent dental trauma. In addition, we will cover very early feeding difficulties and frenectomy treatment, how to provide a valuable experience at the 1yr dental visit, pulp therapies for both primary and permanent teeth and screening for airway difficulties and sleep disordered breathing. Dental trauma content will include highlighting some new treatment options for traumatized teeth such as decoronation, auto transplantation and Regenerative Endodontics Procedures (REPs). We will also show several case studies which show how children can heal from dental injury and how one should consider the child in a larger context of just individual teeth... treating the forest not just a tree. Objectives include:* Become familiar with infant oral health needs and laser frenulectomies ♦ Learn the basic ideas of the risk for Dental Trauma while participating in certain sports & current Primary tooth trauma guidelines ♦ Put the dental life of a child in context of their age and abilities

Local Anesthesia Updates & Prescribing Opioids: *More than ever, dental patients are expecting a pain free and comfortable treatment & post-op experience. This program will provide participants with a review of the relevant anatomical structures and neurophysiology involved in obtaining local anesthesia and pain control in dentistry. It also includes content specifically related to Addiction Training & the Responsibilities & Requirements of Prescribing Schedule II Opioid Drugs, including:* Best Practices for Pain Management in Dentistry ♦ The latest local anesthetic preparations and products as well as a "head to head" comparison of the currently available local anesthetic agents ♦ Indications for and safety of vasoconstrictors in local anesthetic agents ♦ Anatomical Considerations & Local Anesthetic Dosages ♦ Understanding Practices for Pain Management in Dentistry & Procedures for Managing Vulnerable or Substance Use Disorder Patients ♦ Become Familiar with Regulatory Requirements for Prescribers and Dispensers-New guidelines and laws regarding the prescribing of opioids as well as the DEA scheduling of drugs

Superb Restorations-Posterior Composites and Crown Cementation: *This course will demonstrate how to place durable posterior composites predictably and aesthetically without post-operative sensitivity. Additionally, the preparation and cementation of Zirconia (Zirconia Dioxide) crowns and Lithium Disilicate crowns will be discussed. Zirconia can be used in restorations such as crowns, bridges, inlays, veneers as well as resin-retained bridges (Maryland bridge). Learn how to:* Place sensitivity-free posterior composites quickly, with sealed sub-gingival margins ♦ Bond vs. conventionally cement Zirconia restorations ♦ Use Zirconia vs. Lithium Disilicate

OSHA, Infection Control and the CA Dental Practice Act: *This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, and Infection Control. The California Dental Practice Act segment will include:* Basic requirements of the Dental Board (including, the new CA state mandated ethics content), how to avoid Dental Board problems AND Present actual case studies of dentists subjected to Board discipline

Treating Caries Chemically... WTF? (without the filling): *This presentation aims to provide a comprehensive scientific overview of caries risk assessment, along with the utilization of chemical treatments for caries disease at the patient level and minimally invasive dentistry (MID) at the tooth level. New tools, such as the ADA Caries Classification System (ADA CCS), selective caries removal, and chemical approaches like silver diamine fluoride (SDF) and glass ionomer cement (GIC), will be explored in detail. Numerous practical clinical cases will be presented. Objectives include:* Perform a caries risk assessment and present science-based treatment options ♦ Classify caries lesions using the ADA CCS ♦ Use operative treatment only when necessary, using selective caries removal, GIC, and SDF to treat chemically at the tooth level

Redefining the Endodontic-Restorative Continuum: *This course explores the very latest in evidence-based endodontic diagnosis & treatment, covering cutting-edge restorative procedures that enable clinicians to save compromised teeth and ensure a positive long-term prognosis. This case-based lecture will discuss many techniques to biomimetically create tooth structure to perform a root canal & avoid extraction. Objectives include:* Understanding the deep margin elevation technique for deep carious lesions enabling you to save more teeth while eliminating the need for crown lengthening in many of these cases ♦ Learning Treatment of resorption cases ♦ Master vital pulp therapy ♦ Cover the restoration of most endo treated teeth without a post

3-D Radiographic Imaging in Dentistry Including CT-Guided Dental Implant Surgery (NOT Included in the Series): *Cone Beam technology has brought the power of 3D imaging into the dental office. This course will provide a comprehensive introduction to CT Scans, Cone Beam Volumetric Imaging & its dental applications, imaging systems in the US Market, and CT radiographic anatomy. CT-Guided dental implant planning and surgical techniques also provide a less invasive surgical procedure, awareness of anatomical challenges ahead of time, increased precision of implant placement, reduced surgical time, and enhanced patient recovery. Course Objectives include:* Be able to better interpret 3-D radiographic images of the oral and maxillofacial region. ♦ Know the applications for which CBCT is indicated. ♦ Be able to manipulate 3-D dental images on a PC computer. ♦ Understand how 3D technology is used to improve the accuracy and consistency of dental implant placement. ♦ Be able to discuss the work flow from diagnostic study models to surgery. ♦ Become familiar with 3D implant planning software. ♦ Understand why 3D CT-guided surgery is the future of implantology

TUITION	6 COURSE SERIES	EACH INDIVIDUAL COURSE
More than 14 days before an event	Dentist: \$549, Staff: \$399 \$199 for Bonus CBCT Scanning & CT Guided Implants	Lecture Dentist: \$149, Staff: \$129 \$299 for CBCT Scanning & CT Guided Implants
Less than 14 days before an event	Dentist: \$569, Staff: \$419 \$219 for Bonus CBCT Scanning & CT Guided Implants	Lecture Dentist: \$169, Staff: \$149 \$319 for CBCT Scanning & CT Guided Implants

Courses are 8AM-3PM Pacific Standard time and each course is 7 Live CE Units.
